

ACUAMP[®] ACT Series AC Current Transducers

ACT current transducers combine a current transformer and signal conditioner into a single package. The ACT series is available with sensed current ranges from 2A to 2000A with some models offering selectable sensing ranges and industry standard 4-20 mA or 0-10 VDC outputs. The ACT series is designed for application on 'linear' or sinusoidal AC loads and is compatible with most PLCs, data loggers and SCADA systems. This series is available in split-core or fixed core models.

Applications

Automation Systems

- Analog current reading for remote monitoring and software alarms

Data Loggers

- Self-powered 0-10VDC output transducer helps conserve data logger batteries
- Split-core enclosures make using portable data loggers easy

Panel Meters

- Simple connection displays power consumption or other motor status

Features

- 4-20 mA or 0-10 VDC outputs
- Factory matched and calibrated single piece transducer is more accurate than traditional two-piece field installed products.
- Average responding algorithm gives an RMS output on pure sine waves; perfect for constant speed (linear) loads or ON/OFF loads.
- Models with selectable sensing ranges.
- Output is magnetically isolated from the input for safety and to eliminate voltage drop.
- Built-in mounting feet with optional DRA-2B 35mm DIN rail adapter available.
- Five-year warranty

AC Current Switches, Transducers and Indicators

Overview

The AcuAMP series of AC current sensors is a family of high-performance current sensors offering outstanding features, flexibility, and durability at an incredible Price. Choose from a wide selection of current transducers, switches and indicators, all designed in a rugged industry-standard feed-through package, including both fixed core and split core models.

AcuAMP current sensors are available with

a broad selection of input sensing ranges for maximum flexibility across many current ratings. The current transducer output choices include 4-20 mA, 24VDC loop-powered, and 0 to 10 volt self-powered analog outputs. The Current Switch outputs include isolated solid state switches available in Normally Open and Normally Closed configurations or SPDT relays.

Models with output time delay are also offered in the Current Switch series. The

ACL1 Current Indicator senses AC current ranging from 0.5 to 100A and requires no power for the indicating LED.

These current sensors can be mounted in a panel or attached to the monitored conductor with a wire tie. Use the Selection Guide below to find the best sensor for your requirements.

AC Current Sensors, Switches and Transducers Application Guide

Application Guide

AcuAMP current sensors are a great fit for many applications including material handling, fan and pump applications, and heating systems. With current transducers, current switches and current indicators, this sensor family gives you

valuable data for processes ranging from monitoring loads to preventive maintenance. Models with the ability to read True RMS non-sinusoidal waveforms make it easy to monitor applications using variable frequency drives.

Use the application examples to help choose the best sensor model for your application.
