## Which switch is right for you?

## Compact Fusible Switches

## Overview

AutomationDirect Gladiator compact fusible switches provide open fuse indication for faster troubleshooting and reduced downtime. Gladiator switches have Lockout / Tagout capability and finger safe construction to promote safe workplace practices by preventing contact with live components. Positive visible circuit isolation via the disconnect switch makes it easy to view status. Each switch is 35 mm DIN rail mountable for ease of installation and requires no tools. Taking up only $1 / 3$ the space of a molded circuit breaker and $2 / 3$ the space of a traditional fusible switch, Gladiator fusible switches save space in your panel.

## Listings

- UL Class CC fuse version
- UL Listed under UL 98 File E339079, Guide WHTY
- cULus 22.2, No. 4-04

File 339079, Guide WHTY7CE Compliant

- RoHS
- UL Class Midget fuse version
- UL Listed under UL 508

File E222847, Guide NRNT

- cULus 22.2, No. 14-05
- CE Compliant
- RoHS

## Features and Benefits

- Class CC and Midget fuse options
- 200kA Short-Circuit Current Rating (SCCR) with Class CC fuses meets high assembly SCCR and reduced personal protective equipment (PPE) requirements
- Full voltage rating up to 600 VAC allows installation flexibility versus slash-rated devices at 480/277 VAC
- Horsepower rated for protecting motor circuits with Class CC units
- UL 98 disconnect rated for protection of branch circuits
- 35 mm DIN-rail mountable, utilizing spring clip

## Applications

Feeder and Branch Circuit Protection

- Service Entrance or Main Panel Disconnect (UL 98 Class CC)
- Resistive Heating and Lighting Circuit
- Fusible Isolation Switch
- Convenience receptacle circuits (internal / external)
- Motor control circuits
- Load circuits leaving the equipment (external)
- HACR Equipment (Heating Air Conditioning, Refrigeration)
- Computers
- Power supplies

|  | 3 | 3.9 |  | 8 | 15 | 15 |
|  | 5 | 6.1 |  | 15 | 20 | 20 |
|  | 7-1/2 | 9.0 |  | 30 | 30 | 30 |

Note: NEMA motors only (no IEC or Design B Energy Efficient). Minimum size if no more than 1 start / hour. Use Code Max Fuse Amperage in low to moderate reverse / jog / plug applications. Use Heavy Start Fuse Amperage only if Code Max does not allow motor start up. For high reverse / jog / plug applications or larger horsepower motors, Class J fuses are recommended. (Refer to time-current curves for specific applications.) Per NEC 430.52

Dimensions are approximate, mm [inches]

- Not for construction purposes

Replacing Fuses

## Steps:

1. Turn Switch Off.
2. Turn fuse holder compartment knob counterclockwise.
3. Rotate fuse holder compartment knob up.
4. *Remove fuse and replace with appropriate type CC or Midget fuse.

## Gladiciror Compact Fusible Switches

## Auxiliary Contact

N.O. + N.C. contact output to indicate the status of the switching mechanism on the Gladiator switch. Mounts on the right side of the switch.
