EchoPod® & EchoSonic® II Ultrasonic Liquid Level Sensors

SOFTWARE CONFIGURED

The EchoPod and EchoSonic II are innovative ultrasonic liquid level sensor families that replace float, conductance and pressure sensors that fail due to contact with dirty, sticky and scaling media in small, medium and large capacity tanks. Applied in chemical, water and wastewater applications, these general purpose non-contact sensors are available with single and multi-function capabilities including continuous level measurement, switching and control.

For input to a PLC or other controller, measurement outputs include current, voltage and frequency. Models with four relays can be configured for level alarms and/or stand-alone level control such as automatic fill or empty functions using the embedded level controller. PC configuration is simple with WebCal™ software.

Output Types	4-20 mA and (4) SPST relays			(4) SPST relays	0-5V, 0-10V, 976-2000 Hz		4-20 mA			
Install	Vertical, top of tank									
Mounting	2in MNPT	1in MNPT						2in MNPT		
Relays	(4) SPST					No Relay				
Configuration	WebCal Software (free download) and LI99-2001 Fob USB Adapter (purchased separately)									
Ambient Temperature	-31° to 140°F (-35° to 60°C)									
Process Temperature	20° to 140°F (-7° to 60°C)						-4° to 140°F (-20° to 60°C)			
Pressure	30 PSI (2 bar) max.									

* Any factor that negatively affect sound's ability to travel such as, vapor, condensation, foam, turbulence, vacuum, etc., will have a negative effect on the ultrasonic sensor signal and should be avoided. For condensing environments the Flowline UG/US series of Reflective Ultrasonic Level Sensors are recommended.

WebCal Software

WebCal

LI99-2001

WebCal PC software is a utility program that allows users to easily configure their EchoSonic II and EchoPod level transmitters, switches, and controllers. Download your free copy of WebCal 2001). Develop your configuration using pre-programmed function menus as the tank graphic and set point fields automatically change to match your configuration. Then, input your level set point values and click the Write to Unit button. Your configuration will be downloaded into the sensor and verified in less than a second. Last, click the Wiring Diagram button to open a wiring schematic of your configuration in PDF format. Print the document, disconnect the sensor and wire it per the schematic. As new software or firmware becomes available, they can be downloaded and updated through WebCal.

PodView®

LI40-1001

The PodView digital level indicator is a low cost general purpose level indicator that displays engineering units for level or volume and shares power with an EchoPod ultrasonic sensor, including loop powered devices. The LI40 can be field mounted for local indication as well as be used to make simple setting changes to the sensor. The display can be easily attached to any EchoPod sensor that has been configured with WebCal 6.0 / firmware 50.0 or higher. PodView displays sensor output and can reconfigure sensor setpoints on the fly. PodView shares power with the sensor and does not require any additional outside power supply.

EchoSonic II LU Series Ultrasonic Liquid Level Transmitters

Overview

The EchoSonic II LU Series ultrasonic liquid level transmitters provide continuous level measurement up to 9.8 ft (3m), 18ft (5.5 m), 26.2 ft (8m) or 32.8 ft (10m), with a 4-20mA signal output, and are configured via WebCal software. This non-contact liquid level sensor is ideally suited for corrosive, ultrapure, sticky or dirty liquids, and is broadly selected for bulk storage, dry tank, lift station and process tank level applications.

Part No. LU27

Part No. LU23/28/29

Features

• Continuous level measurement up to 9.8 ft (3m), 18 ft (5.5m), 26.2 ft (8m) or 32.8 ft (10m)
• DSP auto adaptive filters enable plug and play operation optimizing signal output filtering and obstacle recognition
• Configuration is fast and easy via WebCal software and USB adapter
• Narrow 2 inch or 3 inch beam width for applications with limited measurement space
• Short 4 inch or 8 inch dead band maximizes the measurable filling capacity of the tank
• PVDF transducer and NEMA Type 6P polycarbonate enclosure for corrosive liquids, UV stable for outdoor use
• Automatic temperature compensation for accurate measurement
• Made in the USA
• **Agency Approvals**
• cFMus

sensor through the Fob USB adapter (LI99-2001). Develop your configuration using pre-programmed function menus as the tank graphic and set point fields automatically change to match your configuration. Then, input your level set point values and click the Write to Unit button. Your configuration will be downloaded into the sensor and verified in less than a second. Last, click the Wiring Diagram button to open a wiring schematic of your configuration in PDF format. Print the document, disconnect the sensor and wire it per the schematic. It's that simple.

Configuration files can be named, saved, emailed, printed, opened and used again under revision control. The advanced feature page enables you to change the measurement signal, output filtering and invert relay states from N.O. to N.C. As new software or firmware becomes available, they can be downloaded and updated through WebCal.

Features

• 169 configurations with pull-down menu selections
• Graphical interface lets you visualize your configuration
• Applicable level set point fields appear automatically
• Installs and tests configuration in less than a second
• Available PDF wiring diagram for each configuration
• Technical help menu with FAQs, tips and glossary
• Rapidly program sensors to the same configuration
• Save configuration files for future use or reference
• Print wiring diagrams and configuration text files
• Email configuration files to other remote users
• Made in the USA
