

# USB Programming Cables

## USB Cables

AutomationDirect's high quality USB cables are used to connect USB devices to a USB port on a PC. Each cable has Standard-A plug to Standard-B plug end connectors, both gold plated, and meet the USB 2.0 requirements. These cables can be used for programming Productivity Series CPUs, C-more panels, certain C-more Micro panels and PC to touchscreen connections for Atlas Industrial Monitors that include touchscreen capability.

## Standard A to standard B

Part Number	Description	Price
<b>USB-CBL-AB3</b>	3-ft (0.9 meter) Standard USB 2.0 cable with Standard-A plug to Standard-B plug. Suitable for all USB devices.	
<b>USB-CBL-AB6</b>	6-ft (1.8 meter) Standard USB 2.0 cable with Standard-A plug to Standard-B plug. Suitable for all USB devices.	
<b>USB-CBL-AB10</b>	10-ft (3 meter) Standard USB 2.0 cable with Standard-A plug to Standard-B plug. Suitable for all USB devices.
