BE A TOOL REBEL

Screwdrivers

ANTI ROLL-OFF

Anti-Rolloff

The hexagonal non-roll feature prevents any rolling away at the workplace.

LASERTIP

Laser Tip

Laser treatment creates a microrough surface on the tip of the blade. The drive end literally bites into the head of the screw. The advantages: less slipping, fewer scratches, higher torque transfer and less screwdriving effort.

Handle Markings

Handle markings include a screw symbol and the size of the tip to help you find the right screwdriver in your tool bag or at the workplace.

KRAFTFORM ERGONOMICS

Kraftform Ergonomics

The Kraftform handle has been designed to fit snugly in your hand, making blisters and calluses a thing of the past even after long-term use. The hard materials used for the handle promote fast grip adjustments and prevent the skin from sticking to the handle. The softer, anti-slip zones facilitate zero-loss transfer of high forces. This is an unbeatable combination! Work is done with a flick of the wrist!

HEX-PLUS

Hex Plus Profile

The problem with hexagon socket screws is the easily "rounded" screw recess. This is caused by the sharp edges of the tool pressing against the inside of the screw profile. Gradual wear eventually grinds and destroys the head of the screw. Wera's Hex-Plus tools provide more contact surface inside the screw profile, which reduces the notching effect and ultimately the deformation of the screw. Hex-Plus tools can also transfer up to 20% more TORQUE.

EXTRA DURABLE

Extra Durable (Black Point)

The Wera Black Point tip and a refined hardening process guarantee a long service life and increased corrosion protection.

Wera Screwdrivers

Insulated Screwdrivers

As with all other Wera tools, safety is a top priority for series 100 VDE screwdrivers. The quality of the blades exceeds current standards with respect to hardness and torque strength.

Tested for dielectric strength

Our screwdrivers are tested for dielectric strength under a 10,000 volt load in a water bath to make sure that their most important property, their insulation, has been exhaustively tested. Each individual Wera VDE screwdriver is subjected to this test to guarantee safe working up to 1,000 volts.

Extra Slim

Reduced blade diameter at the tip with integrated protective insulation, allows recessed screws and spring elements to be accessed and actuated, individually tested as per IEC 60900.
