

Panel Interface Connectors

Overview

What is a Panel Interface Connector?

A panel interface connector (PIC) is a pass-through unit that mounts to the outside of a control panel containing a PLC or other programmable device. Using the pass-through connections, the operator is able to interface with the PLC or other units within the control box without opening the enclosure door. PICs usually contain a power outlet and various connectors necessary for the PLC or other programmable units in the control box. ZipPort PICs are available with single, duplex or GFCI power outlets, as well as a no-power option. Connectors available include D-Sub, RJ45, RJ12, USB, Ethernet, and Data Highway; units are available in various combinations needed for the typical control panel.

Why should I use a Panel Interface Connector?

Installing a PIC on an enclosure allows the operator to access the components inside the enclosure without opening the door. This is an important safety feature which removes many of the risks of working with an open electrical panel. Using a PIC may also eliminate the need for operators to wear fire-resistant suits, hoods and gloves, and use non-conductive tools, prior to accessing electrical enclosures capable of producing Arc Flash*, per NFPA 70E requirements.

**Note: An Arc Flash is a voltage breakdown of resistance of air, resulting in an arc which can occur where there is sufficient voltage in an electrical system and a path to ground or lower voltage.*

Features

- Aluminum housing with gasket
- All connections are normally straight through, pin 1 to pin 1, etc.
- All D-Sub connectors are FEMALE EXTERIOR and MALE INTERIOR referenced to the cabinet.
- The 9-pin D-Sub pin configuration is available as a break out configuration in some units. These connectors allow for the D-Sub to be separated into individual lines. This allows the user to connect to the D-Sub using screw terminal connections.
- Some units are configured for Allen Bradley's®* Data Highway system. In this case, the 9-pin D-Sub and/or 8-pin "mini-DIN" are connected to a 3-pin pluggable terminal block commonly used with "BLUE HOSE" applications.
- The internal power connection for frame sizes 32 and 48 is made via a covered terminal block with spring-type connections.
- The internal power connection for frame sizes 16 and 24 is made via female push-on terminals for Line-in and Neutral, plus a ring terminal for ground.
- The standard reset is a 3 Amp circuit breaker to limit the power output of the unit.
- *Registered trademark of Allen Bradley Company, LLC

Agency Approvals

- NEMA / UL Type 12, 4, & 4x
- IP65
- UL file number E495019
- CE

Panel Interface Connectors Specifications

ZIPport Panel Interface Connectors General Specifications	
Electrical Specifications for PICs with Power Outlet(s)	
Voltage Rating	115VAC
Current Rating	3A with resettable circuit breaker, 15A without resettable circuit breaker
SCCR	10kA 0.2 kA (for units with 3A resettable Circuit Breaker)
Technical Specs	
Agency Approvals	UL Recognized, CE
Degree of Protection	IP65, NEMA/UL 4, 4x, 12 (when mounted with supplied gasket)
Suggested Mounting Screw	#8 -32 x 3/4" for housing sizes 6 through 32. #10 - 32 x 3/4" for size 48 Mounting screws not included with product.
Suggested Screw Torque	10.62 lb/in for housing sizes 6 through 32. 17.7 lb/in for housing size 48
Material Specifications	
Body	Epoxy-coated Die-cast Aluminum
Gasket	Thermo-plastic (TPE)
Handle	Polyamide
Levers	Stainless Steel
Accessories	

One gasket supplied and required during mounting to meet Degree of Protection standards.
Insert with Panel Cutout dimensions for mounting

Table 1		
Cable Code	Cable Part Number	Cable Description
1	ZL-DB9-CBL-2	Male DB9 to Female DB9 adapter cable
2	SVC-PCCFG-CBL	Female DB9 to Female Firewire Servo adapter cable
3	USB-RS232	Male USB form A to Male DB9 adapter cable
4	D2-DSCBL or GS-EDRV-CBL-2	Programming cable for DL05/06, DL105, DL205, DL350, D4-450, Click
5	GS-232CBL	RJ12 to Female DB9 for GS2 DRIVES ONLY
6	USB-CBL-AB_	USB form A to USB form B cable series
7	FA-ISOCAN	RS232 - RS422/485 converter
8	OP-MCBL-1	Optimate cable for Modbus PLCs
9	ZL-DB15-CBL-2	Male DB15 to Female DB15 adapter cable
10	ZL-DB25-CBL-2	Male DB25 to Female DB25 adapter cable
